SUPPORTING DREAMS™

ComfortCare[®] Signature

The Signature Collection features Restonic's Marvelous Middle individually wrapped coil, Restonic TempaGel memory foam, gel-infused Latex, gel-infused quilting foam and the all-new AirFlow™ Border.

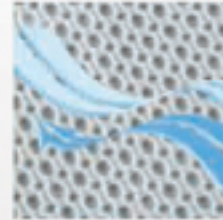

GREEN DUO LATEX

Restonic's Green Latex & memory foam reacts to your body's temperature and conforms to its shape. The cushioning is incredibly resilient, supportive and comfortable, possessing all the ingredients of an extra-special night's sleep.

AIRFLOW™ BORDER

The all new AirFlow™ border allows your mattress to breathe and for you to get a refreshing nights sleep

EXCLUSIVE MARVELOUS MIDDLE™ CONSTRUCTION

Restonic does more in the center third than any other mattress, increasing body support, mattress durability and resiliency.

Our ComfortCare mattresses concentrate more coils in the center third for 25% more support, preventing mattress sagging.

SUPEREDGE PLUS™

High-density foam surrounds the perimeter of the ComfortCare inner-spring, giving you a 100% sleep surface and enhanced edge support without breaking down over time.

RESTONIC IS A MULTIPLE TIME WINNER OF THE CONSUMERS DIGEST BEST BUY™ AWARD

Restonic's flagship Comfort Care collection, featuring our exclusive marvelous middle, is a consistent winner of the Consumer Digest Best Buy Award. The Best Buy seal and other licensed materials are registered certification marks and trademarks of Consumers Digest Communications L.L.C, used under license.

OUTLAST TECHNOLOGY

The Comfortcare Signature mattress with outlast technology absorbs excess body heat, maintaining a balanced temperature. This certified space technology reduces over-heating and provides thermal compatibility with your partner, helping you sleep more soundly - without having to kick off the covers.

SUPPORTING DREAMS™

Quality Sleep

Better sleep begins with a better mattress. You can avoid common sleep problems by choosing a mattress that suits your own specific needs and lifestyle. Here are a few things to consider if you're thinking of buying a new mattress:

- Have your sleep habits changed over the past few years?
- Are you waking up with stiffness, aches or pains?
- Have you enjoyed a better night's sleep in another bed?
- Has your lifestyle changed in the past few years?

With all the options available today, buying a new mattress can be a daunting experience. Do you buy a coil mattress, or do you go with Memory-foam or Latex? Maybe an air bed is the right choice, or perhaps a waterbed? An adjustable bed might be the way to go, or, if space and flexibility are issues, then you might consider a futon. There is no "one-size-fits-all" when it comes to a mattress purchase. In fact, there are only two main factors to consider – Comfort and Support.

Support

Correct support is essential for a restful sleep. A proper mattress will support your body at all points, eliminating sore necks, shoulders, backs, and other aches and pains associated with uncomfortable sleep. Still, selecting the proper mattress is not the only way to ensure a good night's sleep. According to the National Sleep Foundation, you can take these simple steps to enhance your sleeping experience:

- Maintain a regular sleeping and waking schedule.
- Establish a relaxing bedtime routine, like reading or listening to soothing music.
- Keep your sleeping environment dark, quiet, comfortable and cool.
- Use your bedroom only for sleep and intimate encounters.
- Don't eat for two or three hours before retiring.
- Exercise regularly.
- Avoid nicotine, caffeine and excessive alcohol intake close to bedtime.

By following these simple suggestions and choosing the right sleep set, you can enjoy the benefits of a more restful, comfortable and satisfying sleep.

Pocket Spring

The Restonic Pocket Spring collection features quality pocket spring unit produced only with the finest quality wire and heat treated for rust proofing and stress relief. Each coil is constructed of 13 1/2 gauge wire and the border rod is made of a heavy 6 gauge wire for superior strength.

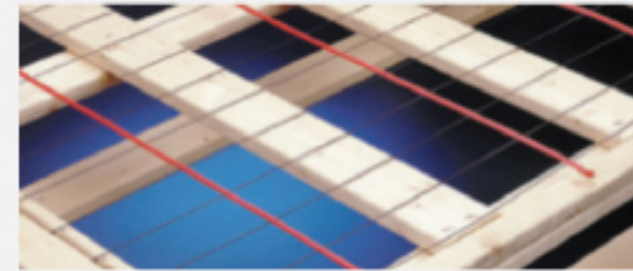

Box Spring

The Restonic Versa-Lok box spring is the finest commercial modular box spring we have ever offered. Constructed of heavy 9 gauge wire, each Versa-Lok module is fastened at two points to the spring frame. This provides for added strength and durability.

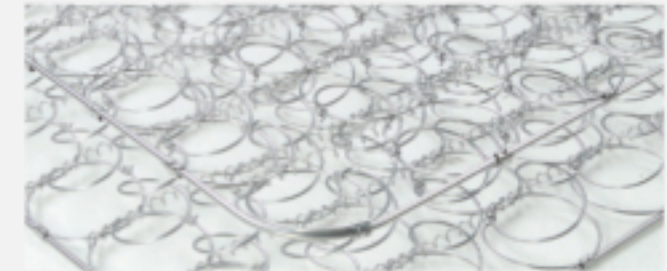

Wood Foundation

A special constructed built-up wood foundation is used to support the mattress. The foundation is 12" in height and is layered with a 200 lb. test durable board. The foundation is covered with a 1/4" of polyurethane foam and a non-skid top panel to prevent the mattress from shifting on the foundation.

Bonnel Spring

Features quality bonnel spring unit produced only with the finest quality wire and heat treated for rust proofing and stress relief. Each coil is constructed of 13 1/2 gauge wire and the border rod is made of a heavy 6 gauge wire for superior strength.

Restonic Limited Warranty

We are happy to warrant against defects in workmanship and material of the sleep set. In the unlikely event that service is required because of such defects after purchase your Restonic mattress and/or foundation will be repaired or replaced (at Restonic option). 5 years limited warranty against manufacturing defects. The warranty covers only the following items during normal wear:

Mattress

- *Wires that are loose, broken or protruding through fabric.
- *Sagging, only if the mattress has been continuously supported by a matching foundation (or equivalent) and used with an appropriate frame and center support, or a minimum of 5 cross slats with 3 concentrated in the third for queen and king sets.
- *Body impressions at least 1 1/2" deep on both sides.

Foundation

- *Broken or loose Modules
- *Compression or unstapling of Moducolls
- *Broken or loose grid top
- *Splitting of the wood frame
- *Loose, bent or defective wood beams
- *Sagging, but only when continuously supported with an appropriate frame with a rigid center support having at least 5 legs or 5 cross slats for queen and king sets.

MATTRESS TIPS AND CARE

The care of your sleep set is an important step in enjoying restful, comfortable and healthy sleep. Like any piece of fine furniture, it will “perform” better and last longer if it is properly maintained. Following the instructions provided by the mattress manufacturer is important, but you can also take these additional. Steps to ensure that your mattress remains an oasis of comfort and luxury in your home.

- **Proper Installation:** Make sure your mattress and foundation are correctly installed. Improper installation can damage your sleep set. If you choose to install it yourself, ask store personnel for advice.
- **Use a Protective Pad:** A good quality, washable mattress pad will keep your mattress free of dirt and stains.
- **Let It Breathe:** A new mattress and foundation should be left uncovered for a few hours so that any factory “odors” have a chance to dissipate.
- **Give It Good Support:** Use a sturdy, solid bed frame. For larger mattress, like kings or queens, make sure they have adequate center support to keep them from breaking or sagging in the middle.
- **Don’t Dry Clean:** Chemicals in dry cleaning may harm fabrics or underlying materials. We recommend vacuuming as the safest and most effective method of cleaning.
- **Don’t Remove the Tag:** Although it is really not illegal to remove the tag, the label information serves as identification in case of warranty claims.
- **Your Mattress is Not a Playground:** Don’t let the kids use your mattress as a trampoline or a set of monkey bars. Rough usage could cause damage to the interior construction.
- **No Boards:** Never put boards between the mattress and foundation. While a board may be a temporary solution to a loss of support, in the long run it will just make things worse. If you think you need a board, you probably need a new mattress instead.
